

Mr. Dmytro Shteflyuk

Address: 162A Akademika Pavlova Street, 132, Kharkiv, Ukraine, 61000

Phones:

mobile: +380-50-5988823

home: +380-57-7036516

Home page: <http://kpumuk.info/>

E-Mail: kpumuk@kpumuk.info

ICQ: 107989380

Yahoo ID: dshteflyuk

Skype: kpumuk

Marital Status: Married

Objectives:

- Ruby on Rails Developer (0.5 years of experience)
- ASP.NET/C#/VB.NET Developer (3 years of experience)
- HTML/PHP Developer (4 years of experience)
- XML/XSLT Developer (2 year experience)

Skills:

Operating Systems:

- Linux: Debian, Ubuntu
- Windows 9x/2000/XP/2003
- MS-DOS

Development skills:

- .NET: Visual Studio .NET, C#, VB.NET, ASP.NET, Windows Forms
- Web Development: HTML, CSS, SSI, CGI, PHP, XML/XSLT
- JavaScript: prototype, script.aculo.us, Mootools
- Ruby, Ruby on Rails
- SQL: Standard SQL and miscellaneous MySQL, MSSQL, Interbase/Firebird extensions
- C/C++: ANSI C/ISO C++ Language with STL, Borland C++ Builder
- Pascal/Delphi
- Remote Development: CVS, SourceSafe, SVN
- Deployment: NSIS, rake
- Graphics/Media: DirectShow, ffmpeg, mencoder

RDBMS Skills:

- MySQL
- Interbase/Firebird
- MSSQL

Spoken Languages:

- Russian (native)
- Ukrainian (native)

- English (speak - basic, read - good (able to read and understand any technical text))

Education (reverse order):

April, May 2006 — Brainbench Certification

- ASP.NET Fundamentals (Master)
- C# (Master)
- C# Fundamentals (Master)

December 2005 — ExpertRating Certification

- PHP (Rent A Coder)

November 2005 — Brainbench Certification

- .NET Framework (Master);
- ASP.NET (Master)
- HTML 4.0 (Master)
- OO Concepts

September 2004 — June 2005 — Kharkov National University of Radio-Electronics

- Master of Science in Computer Systems Engineering
- Graduated from the Intelligent Decision Support Systems Department

October 2004 — Brainbench Certification

- PHP4 (Master);
- C++ Fundamentals (Master);
- C++

September 2000 — June 2004 — Kharkov National University of Radio-Electronics

- Bachelor of Computer Science
- Graduated from the Intelligent Decision Support Systems Department

June 2000 — Lyceum #4, Kremenchuk

- Finished secondary school

Employment history:

- July 2002 — May 2004 — "YATO-Ukraine" (C++ developer)
- May 2004 — October 2004 — "Viacom" (PHP Web-developer)
- October 2004 — August 2005 — "YATO-Ukraine" (PHP Web-developer, C++ developer)
- May 2006 — January 2007 — "Wildbit, LLC", USA (ASP.NET/C# Web-developer, Ruby on Rails Web-developer)
- August 2005 — July 2007 — "Lana Pro", Kharkiv (ASP.NET/C# Web-developer)
- July 2007 — Present — "DB Best Technologies", Kharkiv (Senior ASP.NET/C# Web-developer)

Recent Projects

Power Compress

This program automatically converts recorded TV DVR-MS files created by Windows XP Media Center Edition (MCE) into Windows Media format files using custom quality settings (video frame size, frame rate, bit rate). The program's multi conversion capability lets you select many files at the same time and automatically create the queue of files for conversion.

- *Status:* closed
- *URL:* www.powercompress.com
- *Technologies/Software:*
 - Windows Services (background spool manager and media converter)
 - ActiveX (control for spool managing, Windows XP application for using Power Compress HTML interface without Windows Media Center Edition)
 - DirectShow/DirectX (interfaces for media converting)
 - Windows Media Format SDK
 - Visual C++/ATL
 - Windows Media Center Edition
 - NSIS, custom plugins (software installation)
 - XML/SOAP (simple authorization future for support registered customers)
- *Roles:*
 - Application Design
 - Video files converting
- *Year:* 2005 — 2006

Philly2Night

The site is a nightlife social network that allows people to create profiles, then connect to people before and after events. People can see who is going to an event, click on the profile, and send messages. The model is based on having many cities around the US. Basically, each city has different events, places, and photos, but the users are system-wide.

- *Company:* Wildbit, LLC
- *URL:* www.philly2night.com
- *Technologies/Software:*
 - Microsoft ASP.NET
 - Microsoft SQL Server 2000
- *Roles:*
 - Server Software and System Design
 - Backend/Frontend Development
 - Database Design
- *Year:* 2006

Nuzizo

Nuzizo is a self-evolving social network based on a set of uniquely structured neighborhoods within a virtual city. The original concept is in its infancy and is sure to expand as its citizens raise their voice.

- *Company:* [Wildbit, LLC](#)
- *URL:* www.nuzizo.com
- *Technologies/Software:*
 - Microsoft ASP.NET (primary development platform)
 - Microsoft SQL Server 2000 (system DBMS)
 - mplayer, mencoder, ffmpeg (thumbnails, audio and video files management, etc)
 - Yahoo Widgets (displays status, rating, vibe changing)
- *Roles:*
 - Backend/Frontend Development
- *Year:* 2006

PodcastPeople

The general idea of the service is podcasting. Every user of the system allowed to create his own show with his own brand, and publish content (podcasts, screencasts, blog entries). There is sponsors support implemented (their advertisements would be rotated on show pages). Access to the system granted on subscription base.

- *Company:* [Wildbit, LLC](#)
- *URL:* www.podcastpeople.com
- *Technologies/Software:*
 - Ruby on Rails (primary development platform)
 - MySQL (system DBMS)
 - mplayer, mencoder, ffmpeg (thumbnails, video and audio files management, etc)
 - Flash Media Server (online podcasts recording)
 - Apache
 - Paymentech (payments gateway)
 - Amazon S3 (media files storage)
- *Roles:*
 - Server Software and Scalable System Design
 - Backend/Frontend Development
 - Database Design
 - Video and audio files converting
- *Year:* 2006

Best Tech Videos

"Best Tech Videos" is a user driven social content website dedicated to finding the best educational videos for developers, designers, managers and other people in IT. If you are professional developer, you can find here new videos from recent conferences, interviews with famous people in IT, and much more.

- *URL:* www.bestechvideos.com
- *Technologies/Software:*
 - Ruby on Rails (primary development platform)
 - MySQL (system DBMS)
 - Sphinx Search Engine (indexing and content search)
- *Roles:*
 - Server Software and Scalable System Design
 - Backend/Frontend Development
- *Year:* 2007
